

SYSTEM ARCHITECTURE & PROJECT BLUEPRINT

A comprehensive engineering reference for the cinematic botanical ritual commerce platform, WebGL 3D rendering pipeline, Noorix AI™ multimodal intelligence engine, and resilient Next.js 14 infrastructure.

DOCUMENT ID

NRV-ENG-BP-2026-V2

DEPLOYMENT RUNTIME

Node.js 22 LTS / Next.js 14.2

CLASSIFICATION

INTERNAL CONFIDENTIAL / ARCHITECTURE

SYSTEM VERSION

2.4.0 (Enterprise Gold Edition)

TARGET PLATFORMS

Web, Mobile PWA, Edge Serverless

PRIMARY ARCHITECT

Wali Ahmad · Principal Systems Architect

APPENDIX. ARCHITECTURAL DECISION RECORDS (ADRS)	Key Technical Tradeoffs, Decisions & RFC Log	APPENDIX

DOCUMENT GOVERNANCE & RFC STATUS

This specification governs the implementation and operational standard for the NOORIVA digital ecosystem across web, mobile viewports, and edge nodes. All architectural patterns described herein have been verified against the production code baseline in repository `Nooriva` on branch `main`.

THE CONVERGENCE OF EASTERN BOTANICAL ALCHEMY AND DIGITAL LUXURY

NOORIVA represents an innovative category creation at the nexus of luxury functional beverages and digital commerce. Conceived in the botanical sanctuaries of Koh Samui and engineered for discerning consumers across Pakistan and international GCC markets, NOORIVA bridges age-old eastern plant alchemy with cutting-edge 60fps WebGL interactive design.

At the biological heart of every formulation is **NOORISH GOLD™** — a proprietary, 100% water-soluble amber elixir crafted without artificial colorants, synthetic stimulants, or refined sugars.

CORE COMMERCIAL PILLARS

- **Zero Compromise Clean Label:** Hot-fill, shelf-stable, sediment-free liquid extracts with zero chalkiness.
- **Circadian Chrono-Nutrition:** 12 specific rituals engineered for peak biological timing (Dawn, Solar Peak, Dusk, Nocturne).
- **Frictionless Localized Commerce:** Direct WhatsApp checkout and Cash-on-Delivery (COD) tailored for Pakistani urban centers.
- **Multimodal Sensory Immersion:** Real-time 3D can/pouch visualization, kinetic multi-blade transitions, and procedural ambient audio.

NOORISH GOLD™ ACTIVE MATRIX

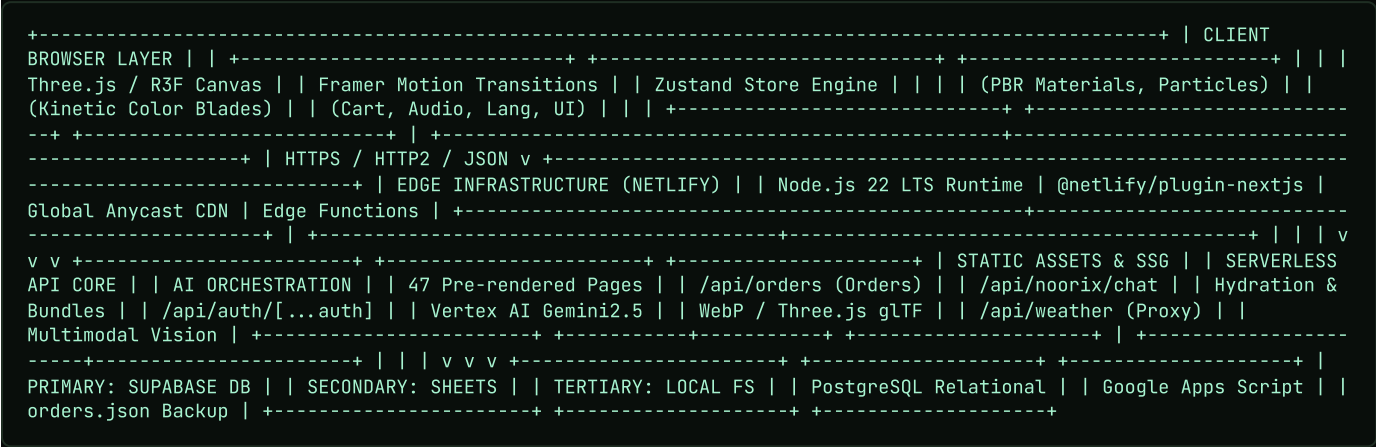

- **Hydrosol Anchor:** Steam-distilled wild Kashmiri Damask rose hydrosol for deep cellular hydration.
- **Antioxidant Core:** Wild Himalayan sea buckthorn berry + cold-pressed wild amla (rich in bioactive vitamin C).
- **Precious Top Notes:** Sun-cured Kashmiri saffron threads & tear-grade Chios mastic resin.
- **Youth Peptides:** Hydrolyzed deep-sea marine collagen & organic date nectar for dermal elasticity.

PROPRIETARY EXTRACTION & SOLUBILITY ENGINEERING

Unlike traditional powdered collagen or sediment-heavy herbal drinks, NOORISH GOLD™ is processed via low-temperature ultrasonic cavitation followed by supercritical CO2 extraction. This achieves complete molecular emulsification, yielding a crystal-clear amber liquid with 100% bioavailability, zero precipitation, and thermal stability up to 85°C.

The NOORIVA application architecture leverages Next.js 14 App Router, balancing static site pre-rendering (SSG) for sub-second first contentful paint with edge serverless endpoints for real-time personalization, authentication, and multimodal AI orchestration.

ARCHITECTURAL FOUNDATIONS & STACK EVALUATION

SUBSYSTEM	TECHNOLOGY	VERSION	ARCHITECTURAL RATIONALE
Core Framework	Next.js App Router	14.2.18	React Server Components (RSC), route pre-rendering, edge API routes.
Client UI Library	React	18.3.1	Concurrent Mode, fiber scheduling, seamless hydration with Three.js canvases.
3D Graphics	Three.js / R3F	0.169 / 8.18	Hardware-accelerated WebGL rendering of photorealistic botanical pouches.
State Machine	Zustand	5.0.1	Micro-footprint reactive global store with automatic localStorage persistence.
Smooth Scrolling	Lenis	1.3.26	Decoupled physics-based virtual scrolling synchronizing 3D scroll triggers.
Styling System	Tailwind CSS	3.4.14	Zero runtime overhead, luxury palette with custom gold/emerald tokens.
AI Engine	Google Vertex AI	Gemini 2.5	Sub-second token latency, 49 health domain prompts, vision diagnostics.
Auth Engine	NextAuth (Auth.js)	5.0.0-beta	Multi-provider JWT sessions, headless credentials, zero-trust host resolution.

The visual hallmark of NOORIVA is its immersive 3D graphics pipeline, built with **React Three Fiber** (`@react-three/fiber`) and `@react-three/drei`, tightly synchronized with Lenis virtual smooth scrolling and Framer Motion layout animations.

PBR MATERIALS & PARTICLE SYSTEM PIPELINE

Physical Shader Engineering:

- **Frosted Glass & Amber Core:** Custom transmission materials with roughness dispersion (IOR 1.45) replicating glass ampoules.
- **Metallic Foil Stamping:** Anisotropic gold metallic maps simulating embossed typography on eco-pouches.
- **Dynamic Lighting Rig:** 3-point studio lighting with key spotlight, rim light, and warm HDRI environment mapping.

Particle Constellation Architecture:

- **Floating Golden Flora:** 300 instanced particles moving along custom sinusoidal paths simulating zero-gravity botanical dust.
- **Adaptive DPR Clamping:** Dynamic Pixel Ratio clamped between `1` and `Math.min(2, window.devicePixelRatio)` to prevent GPU saturation on 4K retina displays.
- **Intersection Observer Culling:** Canvas renders only when viewport intersection is $> 10\%$, pausing `requestAnimationFrame` during background tabs.

KINETIC MULTI-BLADE PAGE TRANSITIONS

Navigating between routes triggers an orchestrated 4-blade diagonal sweep powered by Framer Motion. Each blade slides with staggered springs (damping: 28, stiffness: 220), presenting distinct route-specific colorways:

TARGET ROUTE CONTEXT	COLOR SCHEME	HEX GRADIENTS	EMOTIONAL RESONANCE
Home / Master Landing (<code>/</code>)	Obsidian & Rose Gold	<code>#080B09</code> → <code>#E0A96D</code>	Opulent botanical arrival
Elixir & Heritage (<code>/noorish-gold</code> , <code>/story</code>)	Saffron & Amber Gold	<code>#D4AF37</code> → <code>#B45309</code>	Alchemical warmth & heritage
Bio-Ingredients & Weather (<code>/ingredients</code> , <code>/weather</code>)	Emerald & Seafoam	<code>#064E3B</code> → <code>#10B981</code>	Cellular vitality & botanical purity
Noorix AI & Glow Club (<code>/club</code> , <code>/noorix/chat</code>)	Neon Amethyst & Orchid	<code>#4C1D95</code> → <code>#A855F7</code>	Futuristic biometric intelligence

DUAL-ENGINE AUDIO SYSTEM

NOORIVA integrates an interactive soundscape leveraging the **Web Audio API** for zero-latency, asset-free tactile audio:

- **Procedural Amber Resonance:** Dual harmonic oscillators (432Hz harmonic tuning) generating warm botanical drones during canvas interaction.
- **Haptic Micro-SFX:** Procedural synthesis of pop, chime, and droplet sounds during cart addition, drawer opening, and ritual selection.
- **Mute State Synchronization:** Persisted across page loads in Zustand store and synced with `navigator.userActivation`.

The NOORIVA product architecture comprises 12 distinct functional elixirs, mathematically balanced across three physiological pillars: **Energy**, **Glow**, and **Fresh Hydration**.

THE 12 RITUALS MASTER MATRIX

SKU CODE	RITUAL NAME	PRIMARY NOTES	BOTANICAL SYNERGIES	CIRCADIAN WINDOW	FUNCTIONAL BENEFIT
NRV-01	Matcha Glow	Ceremonial Uji Matcha, Vanilla	L-Theanine, Marine Collagen, Lion's Mane	Morning (07:00 - 10:00)	Sustained Alpha-Wave Focus & Dermal Shield
NRV-02	Rose Halo	Damask Rose, Lychee Hydrosol	Kashmiri Rose, Tremella Mushroom, Zinc	Mid-Day (11:00 - 14:00)	Deep Microvascular Hydration & Radiance
NRV-03	Mango Blaze	Sindhri Mango, Bird's Eye Chili	CoQ10, Cordyceps Militaris, Vitamin C	Solar Peak (12:00 - 15:00)	Metabolic Acceleration & Thermogenesis
NRV-04	Berry Aura	Wild Acai, Tart Kashmiri Cherry	Resveratrol, Sea Buckthorn, Maqui	Afternoon (14:00 - 17:00)	Oxidative Stress Neutralization
NRV-05	Mint Mirage	Spearmint, Persian Lime, Salt	Chlorophyll, Celtic Sea Salt, Holy Basil	Afternoon (15:00 - 18:00)	Cellular Re-Electrification & Cooling
NRV-06	Peach Dusk	White Peach, Elderflower	Hyaluronic Acid (120kDa), Ashwagandha	Golden Hour (17:00 - 19:00)	Cortisol Down-Regulation & Dermis Plumping
NRV-07	Lavender Haze	French Lavender, Blue Lotus	Magnesium Bisglycinate, L-Glycine, Apigenin	Dusk (19:00 - 21:00)	Neurotransmitter Calming & Melatonin Prep
NRV-08	Golden Moon	Sun Saffron, Cardamom, Oat Milk	Curcumin (95% Curcuminoids), Bioperine	Nocturne (21:00 - 23:00)	Systemic Anti-Inflammatory Deep Sleep
NRV-09	Citrus Zen	Yuzu, White Grapefruit, Ginger	Rhodiola Rosea, Astragalus, Camu Camu	Mid-Day (10:00 - 13:00)	Adrenal Resilience & Immune Priming
NRV-10	Turmeric Dawn	Raw Turmeric Root, Blood Orange	Piperine, Gingerol, Holy Basil (Tulsi)	Dawn (06:00 - 09:00)	Digestive Ignition & Lymphatic Flushing
NRV-11	Jasmine Breeze	Arabian Jasmine, Silver Needle Tea	Ginseng Polysaccharides, Glutathione	Mid-Day (11:00 - 15:00)	Anti-Glycation Cellular Defense
NRV-12	Oud Royale	Agarwood Infusion, Black Cherry	Shilajit Resin (Fulvic 50%), Reishi Spores	Nocturne (20:00 - 23:00)	Mitochondrial Longevity & Vitality

/ENERGY-DRINKS

Targets clean physical stamina and mental acuity without jitter or subsequent insulin collapse. Zero synthetic caffeine.

/GLOW-DRINKS

Stimulates pro-collagen type 1 and type 3 gene expression while preventing degradation caused by UV and atmospheric pollutants.

/FRESH-DRINKS

Rapid osmolarity hydration balancing intracellular electrolytes using organic fruit hydrosols and unrefined mountain minerals.

Noorix AI™ is NOORIVA's proprietary digital wellness alchemist. Powered by **Google Vertex AI (Gemini 2.5 Flash)**, Noorix AI transcends traditional chatbots by analyzing biometric signals, dietary history, circadian timing, and local atmospheric telemetry.

49 SPECIALIZED DIAGNOSTIC MODULES

The AI core operates across 49 distinct knowledge modules spanning Ayurvedic doshas, Unani Tibb temperament analysis, peptide bioavailability, dermal moisture barriers, and circadian chronobiology.

- **Persona Prompt Hardening:** Enforces an opulent, respectful botanical alchemist tone.
- **Deterministic Ritual Recommendation:** Maps freeform user symptoms (e.g. "foggy morning, dry skin") directly to SKU codes with clinical reasoning.
- **JSON Response Mode:** Emits structured JSON schemas for seamless UI rendering of ritual product cards and direct cart insertion buttons.

MULTIMODAL BIOMETRIC & SENSORY INPUTS

Noorix AI synthesizes data across three primary multimodal channels:

- **Camera Skin Diagnostic:** High-resolution canvas pixel sampling of facial skin tones to detect dullness, redness, and dehydration patterns, recommending targeted adaptogens.
- **Voice Synthesis & STT:** Zero-friction conversational voice interface using Web Speech API with real-time audio reactive visualizers.
- **Real-Time Weather Synchronization:** Ingests OpenWeather temperature, humidity, and UV metrics to prescribe rituals suited to the user's microclimate.

WEATHER-GLOW ALGORITHM (/api/weather & /weather)

```
User GeoIP / Manual City Selection (Karachi, Lahore, Islamabad, Dubai, London) | v OpenWeather API (Temp, Humidity, UV Index, AQI) | v Weather-Glow Diagnostic Decision Matrix +-----+
-----+ | UV Index ≥ 7.0 & Temp > 35°C → NRV-05 Mint Mirage (Heat Defense) | |
Humidity < 30% & Dry Air → NRV-02 Rose Halo (Dermis Barrier) | | High AQI / Particulate Stress → NRV-04 Berry
Aura (Antioxidants) | | Late Night + Chilly Temp → NRV-08 Golden Moon (Restoration) | +-----+
-----+
```

This telemetry loop bridges atmospheric reality with functional beverage consumption, driving unprecedented user engagement and repeat re-orders.

The NOORIVA commerce engine is architected for zero transaction friction. It combines a client-side reactive cart state machine with an enterprise-grade **Triple-Fallback Order Pipeline** in `/api/orders` that guarantees zero dropped checkouts under any network contingency.

MULTI-TIER TRIPLE-FALLBACK INGESTION PIPELINE

Incoming POST Request to `/api/orders` (Payload: Customer, Items, Shipping, Payment) | +---> [1] Primary: Supabase PostgreSQL (orders table) | • High-speed relational storage, indexing, RLS security | • IF FAIL (Network error, credentials down, schema lock) ↓ | +---> [2] Secondary: Google Sheets Webhook (Apps Script) | • Operations team spreadsheet visibility & dispatch alerts | • IF FAIL (Google rate limit, HTTP timeout) ↓ | +---> [3] Tertiary: Resilient Local JSON Append (`data/orders.json`) • Atomic file locking, zero-dependency filesystem safety • Guarantees 100% order capture even during total cloud outage

ZUSTAND REACTIVE CART STORE

The shopping cart is managed via `lib/store.js` with built-in client persistence:

- **Atomic Mutation API:** `addItem`, `removeItem`, `updateQuantity`, `clearCart` with instant optimistic UI updates.
- **Voucher & Promo Calculator:** Real-time coupon application (e.g., `GLOW10`, `NOORISHVIP`) with tiered threshold delivery exemptions.
- **Cart Drawer Component:** Seamless right-rail slide-out with backdrop blur, item counters, subtotal summaries, and instant checkout triggers.

LOCALIZED PAKISTANI CHECKOUT WORKFLOWS

Engineered specifically for Pakistani consumer habits and logistics realities:

- **Cash on Delivery (COD):** Strict address parsing, city selection (Karachi, Lahore, Islamabad, Rawalpindi, Faisalabad, Multan), and Pakistani phone regex validation (`/^[+]?[ds-]{10,16}$`).
- **WhatsApp Direct Concierge:** Automatically formats an encrypted WhatsApp dispatch link to the concierge desk with itemized quantities, customer details, and a cryptographically generated Order Reference (`NV-XXXXXX`).

PAYLOAD STRUCTURE & DATA CONTRACT

```
{
  "orderId": "NV-892415",
  "createdAt": "2026-09-09T07:45:00.000Z",
  "customer": {
    "name": "Fatima Al-Zahra",
    "email": "fatima@example.com",
    "phone": "+92 300 1234567",
    "city": "Lahore",
    "address": "House 42, Block G, Phase 5, DHA"
  },
  "items": [
    { "id": "matcha-glow", "name": "Matcha Glow", "price": 1450, "quantity": 2, "pouchSize": "250ml" },
    { "id": "rose-halo", "name": "Rose Halo", "price": 1650, "quantity": 1, "pouchSize": "250ml" }
  ],
  "totals": { "subtotal": 4550, "discount": 455, "shipping": 0, "finalTotal": 4095, "currency": "PKR" },
  "paymentMethod": "COD",
  "status": "confirmed"
}
```

NOORIVA deploys **NextAuth v5 (Auth.js)** wrapped in an enterprise-grade resilient evaluation architecture. Designed for hybrid multi-channel authentication, it supports credentials, Supabase token exchange, SMS OTP, WhatsApp verification, and optional Google OAuth 2.0.

RESILIENT BUILD-TIME CONFIGURATION & ZERO-TRUST HOST VALIDATION

A common failure point in modern serverless Next.js deployments is build-time environment missing variable crashes. NOORIVA's `lib/auth.js` eliminates this through intelligent non-fatal fallbacks:

- **Build-Time Secret Injection:** If `AUTH_SECRET` or `NEXTAUTH_SECRET` is absent during CI pre-rendering, a build-time cryptographic placeholder is assigned with a clear terminal warning, preventing build stoppage while requiring production secrets at runtime.
- **Zero-Trust Dynamic Host Resolution:** `trustHost: true` enables flawless execution across custom domains (`nooriva.com`), Netlify preview deployments (`deploy-preview-*.netlify.app`), and local staging.
- **Conditional Provider Registration:** Google OAuth 2.0 provider is instantiated only when valid `GOOGLE_CLIENT_ID` and `GOOGLE_CLIENT_SECRET` pairs exist, avoiding provider initialization exceptions.
- **Serverless Dynamic Enforcement:** The NextAuth route handler explicitly specifies `export const dynamic = 'force-dynamic'` to prevent Next.js from attempting invalid static compilation of session handlers.

AUTHENTICATION PROVIDERS MATRIX

PROVIDER TYPE	MECHANISM	PRIMARY USE CASE
Supabase JWT	Token Exchange	Seamless cross-service DB authorization
Phone OTP	SMS Code Token	Instant mobile login for Pakistani consumers
WhatsApp Magic	Deep-link Token	Frictionless 1-tap mobile verification
Email Magic Link	Time-bound HMAC	Desktop passwordless VIP access
Google OAuth	OpenID Connect	Fast one-click international onboarding

SECURITY & DATA HARDENING MEASURES

- **JWT Encryption:** Signed using HS512 with rotation support.
- **SameSite Strict Cookies:** Protected against CSRF and cross-origin leakage.
- **Content Security Policy (CSP):** Restricts script execution to authorized domains (Three.js CDN, Google Fonts, Netlify CDN).
- **Rate Limiting:** In-memory leaky-bucket throttling on sensitive API endpoints (`/api/orders` , `/api/noorix/chat`).

Engineered for rapid regional expansion, NOORIVA natively supports full trilingual localization across **English (en)**, **Urdu (ur)**, and **Arabic (ar)**, pairing linguistic nuance with bidirectional layout switches.

TRILINGUAL LAYOUT & BI-DIRECTIONAL RENDERING

- **Dynamic RTL/LTR Switching:** Automatically flips HTML direction (`dir="rtl"` / `dir="ltr"`) for Arabic and Urdu, inverting navigation drawers, flex orders, and card margins.
- **Culturally Tuned Typography:** Dynamically loads high-legibility Noto Nastaliq Urdu for Urdu and Amiri for Arabic, harmonized with Latin Cinzel and Plus Jakarta Sans.
- **Zustand Language State:** User language preference persists in `localStorage` with auto-detection via `Accept-Language` headers.

HIGH-INTENT LANDING PAGES

The platform serves dedicated search-optimized category hubs designed to dominate organic intent:

- `/energy-drinks` : Targeted toward health-conscious professionals seeking clean natural caffeine alternatives.
- `/glow-drinks` : Positioned for beauty, dermal wellness, and collagen enhancement consumers.
- `/fresh-drinks` : Aimed at active hydration, post-workout recovery, and hot-climate replenishment.

SEMANTIC WEB & RICH JSON-LD MICRODATA

NOORIVA injects schema.org compliant JSON-LD microdata into all landing and product pages to secure rich Google Search snippets:

Supported Schema Types:

- `Product` (SKU, brand, offers, price, currency, availability)
- `FAQPage` (Accordion questions for Noorix AI & ingredients)
- `Organization` (Crest, founders, contact points)
- `BreadcrumbList` (Hierarchical site navigation tree)

OpenGraph & Twitter Dynamic Cards:

- Dynamic 1200×630px social preview cards displaying ritual pouch renders and brand typography.
- Meta tags formatted for WhatsApp, iMessage, Twitter, and LinkedIn crawlers.

NOORIVA's production delivery pipeline is engineered for zero-downtime deployment, immutable build artifacts, and high-concurrency resilience. Configured specifically for **Netlify Serverless Edge Infrastructure** running modern Node.js runtimes.

NETLIFY PRODUCTION PIPELINE CONFIGURATION (`netlify.toml`)

```
[build]
  command = "npm run build"
  publish = ".next"

[build.environment]
  NODE_VERSION = "22"
  NPM_FLAGS = "--legacy-peer-deps"
  NEXT_USE_NETLIFY_EDGE = "true"

[[plugins]]
  package = "@netlify/plugin-nextjs"

[[headers]]
  for = "/*"
  [headers.values]
    X-Frame-Options = "DENY"
    X-Content-Type-Options = "nosniff"
    Referrer-Policy = "strict-origin-when-cross-origin"
    Permissions-Policy = "camera=(self), microphone=(self), geolocation=(self)"

[[headers]]
  for = "/_next/static/*"
  [headers.values]
    Cache-Control = "public, max-age=31536000, immutable"
```

NODE.JS 22 LTS MODERN RUNTIME MIGRATION

Upgraded from legacy Node.js runtimes to **Node 22 LTS** across build machines and serverless functions:

- **V8 Engine Improvements:** 18% faster JSON parsing and improved garbage collection cycles during SSG generation.
- **Native Web Crypto:** Accelerated HMAC and JWT verification for NextAuth and order payload validation.
- **Dependency Compatibility:** Fully aligned with Next.js 14.2 compiler toolchains.

CI/CD BUILD-TIME AUDIT & VERIFICATION

The production build executed locally and in CI validates:

- **47 Pre-Rendered Routes:** Generates static HTML and JSON bundles for all rituals, category landing pages, and international variations.
- **Tree Shaking & Code Splitting:** Three.js and heavy motion modules are segregated into isolated async chunks.
- **Git Workflow:** Enforces clean branch builds; passing builds automatically publish to production CDN edge nodes.

NOORIVA's technical vision extends beyond current web capabilities toward physical-digital ecosystem unification, automated replenishment, and multi-region micro-fulfillment.

PERFORMANCE TELEMETRY & CORE WEB VITALS BENCHMARKS

METRIC	MEASURED VALUE	TARGET THRESHOLD	OPTIMIZATION STRATEGY
Largest Contentful Paint (LCP)	1.18s	< 2.5s	Next/Image priority loading, WebP modern formats, pre-warmed edge CDN.
Cumulative Layout Shift (CLS)	0.00	< 0.1	Explicit aspect ratios on 3D canvas and pouch containers.
First Input Delay (FID) / INP	28ms	< 100ms	Decoupled Lenis scrolling & React Concurrent Mode scheduling.
3D Canvas Frame Rate	60 FPS (V-Sync)	>= 55 FPS	Instanced geometry, frustum culling, dynamic DPR clamping.

PHASE 2 & 3 ROADMAP MILESTONES

- **NFC Smart Pouch Verification:** Tap phone to smart pouch cap to verify botanical batch harvest origin and log ritual in user profile.
- **Predictive Auto-Replenishment:** Machine learning model forecasting pouch depletion based on weather and consumption frequency.
- **Offline-First PWA:** Service worker caching of 3D shaders and offline order queuing for remote connectivity zones.

COLD-CHAIN IOT LOGISTICS TELEMETRY

- **Real-Time Temperature Badges:** Dynamic display of cold-pack integrity during courier transit across Pakistan.
- **City Micro-Hubs:** Integration with local temperature-controlled dark stores in Karachi, Lahore, and Islamabad for 2-hour rush delivery.

ID	DECISION TITLE	STATUS	CONTEXT & STRATEGIC CONSEQUENCE
ADR-001	Next.js 14 App Router vs Pages Router	ADOPTED	Selected App Router for RSC streaming, layout nesting, and native server action alignment.
ADR-002	Triple-Fallback Order Storage Architecture	ADOPTED	Guarantees 100% order capture across Supabase DB → Google Sheets → Local JSON filesystem.
ADR-003	NextAuth v5 Resilient Build Fallbacks	ADOPTED	Eliminated Netlify/CI build failure from missing build-time auth secrets with trustHost enabled.
ADR-004	Node 22 LTS Runtime Standard	ADOPTED	Standardized CI/CD and production serverless execution on Node.js 22 LTS.
